PROJECTS

Github API Wrapper [Github](#)

- Developed a user-friendly tool using HTML, CSS, and JavaScript to fetch GitHub user information.
- Utilized GitHub API to retrieve data such as followers, following, and repositories.

Notes Application [Link](#)

- Created a note-taking app using React, leveraging the useState hook for state management.
- Implemented a search bar and incorporated a dark mode option for enhanced user experience.
- Styled the app using pure CSS, resulting in a polished and visually appealing interface.

MOVIX [Github](#)

- application built using cutting-edge frontend technologies like React, Redux, and SCSS.
- Seamlessly fetching movie data from the renowned TMDB API, Movix presents a curated selection of films tailored to your preferences.

CERTIFICATES

- HTML and CSS for modern web development ([link](#))
- JavaScript - Everything that you need to know ([link](#))
- Advanced Practical JavaScript ([link](#))
- Complete GIT and GitHub ([link](#))
- Tailwind CSS 3 ([link](#))
- Technical Support Fundamentals ([link](#))

ACHIEVEMENTS

- winner of 50-days of JavaScript challenge from codedamn platform
- I have participated in various Google Cloud initiatives, including Cloud Ready and the 30-Day Cloud Practice in GCP.
- I Engaged in Hacktoberfest, an open-source contribution event, during the years 2020 and 2021.
- I was selected for GSSoC'23 (GirlScript Summer of Code 2023).
